

Aventus UP

Aventus AP

Aventus extract air system

Solution for venting interior bathrooms

The Aventus extract air system is designed for venting interior damp rooms. Unpleasant smells and moisture are reliably removed. Thanks to its versatility, Aventus is suitable as an add-on system for the ventilation systems iV. Combined with the ALD fresh air inlets it may be used as exhaust air system.

Specification

Aventus UP [W x H x D, mm]	255 x 255 x 105
Aventus UP Slim [W x H x D, mm]	245 x 245 x 83
Aventus UP Fire safety [W x H x D, mm]	255 x 255 x 95
Aventus AP [W x H x D, mm]	260 x 260 x 130
Extract air flow [m³/h]	max. 100
Power consumption [W]	7 - 24
Operating voltage [V AC] / [Hz]	230 / 50
Sound emission [dB(A)]	30 - 46
Type of protection / Protection class	IPX5 / II

Benefits at a glance:

- **Variation diversity:** Different sorts of casings and fittings suitable for all building requirements and installation situations (e. g. surface mounting, flush mounting, fire protection). Connection to a second room available.
- **Top-class features:** As standard with run-on control and start delay. Both optionally adjustable (N version). Also available with humidity sensor (NF version).
- **Installation advantage:** Quick and simple fan installation. Slim casing with only 83 mm installation depth selectable.
- **Optimum ventilation:** Extract air flow with up to 100 m³/h, also as a 2-stage with 30/60 m³/h available.
- **Convenient for bathrooms:** Planning for windowless extract air rooms possible.
- **Reliability:** 5-year manufacturer guarantee
